

## How to Start a Charge on a ChargePoint Station

Charging your electric vehicle (EV) anywhere you go is easy and convenient with ChargePoint. Once you're at a charging spot, here's how to start charging.

- 1 To start a charge - tap your ChargePoint card on the station.

- 2 Push the button on the connector and lift it out of the holster on the station.
- 3 Plug the connector into your EV to start charging. Check to make sure your EV is charging.

### Tip

Many EVs have an indicator light on the dashboard that shows if the vehicle is charging.

- 4 When charging is finished, just unplug and return the connector to the station (hit the stop charging button on the station if you're fast charging).
